Anissa (u NEE suh) Nierenberger is a certified professional realtime trainer. She has fun helping reporters boost their realtime skills so that they can continue to keep up with the rapid pace of technology and make more money!

As a very young girl, Anissa became intrigued with typewriters when she first saw and heard a blue IBM Selectric typewriter at her dentist office. During a high school career day with a court reporter, she saw a steno machine and knew that steno was going to be her passion! Her career includes three decades of captioning news, sports and tech captioning at Facebook and Amazon.

She has researched and created Dictionary Jumpstart, the only dictionary building program in the industry. DJ consists of 10 modules containing over 165,000 words that can be added to your dictionary at 1,000 words per hour!

Over 1600 stenographers have successfully attained their realtime goals and certifications after training with Anissa. Reporters turn to Anissa when they're ready to upgrade their careers!

Anissa is the author of four books that help reporters write shorter by learning brief families. Most recently Anissa has created STENÖphonătic, the first word building card game in English and steno!

Please contact Anissa at anissa@learntocaption.com to schedule her for a speaking engagement.
